# Weatherproof LED Tree INSTALLATION

## PACKING BOX

THIS WAY UP

INSTALLATION TOOLS
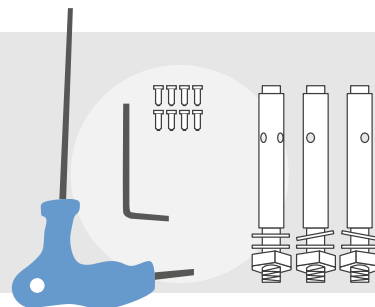

START WITH YOUR TRUNK

1 Find a flat area to place tree trunk in desired position. If using permanent installation or for outdoor use, bolt down to secure your tree.
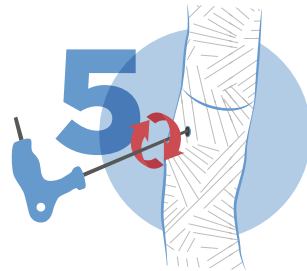

2 Connect the male/female electrical connectors, following the matching numbered trunk sections.

**3** Screw the protective cap over the connections to ensure a watertight seal.

PROTECTIVE CAP

**4** Slide connected wires into trunk parts and slot pieces into place.

5 Using Allen key secure the trunk with grub screw.

FINISH WITH CONNECTING BRANCHES

6 Plug the male/female electrical connectors and screw the protective cap over the connections to ensure a watertight seal.
