Warm White Weatherproof LED Tree INSTALLATION
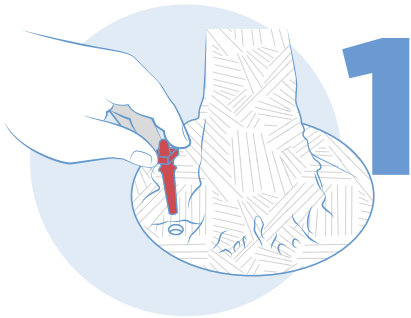

PACKING BOX

THIS WAY UP
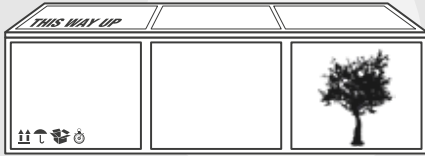

INSTALLATION TOOLS
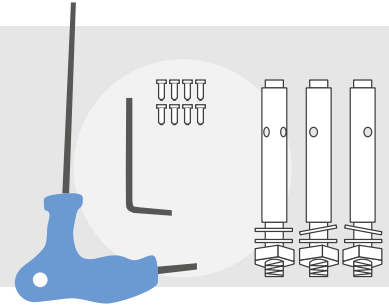

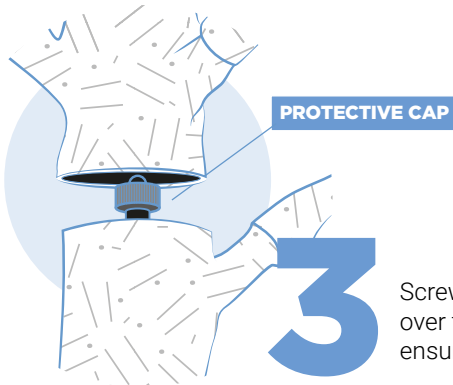

START WITH YOUR TRUNK

1 Find a flat area to place tree trunk in desired position. If using permanent installation or for outdoor use, bolt down to secure your tree.
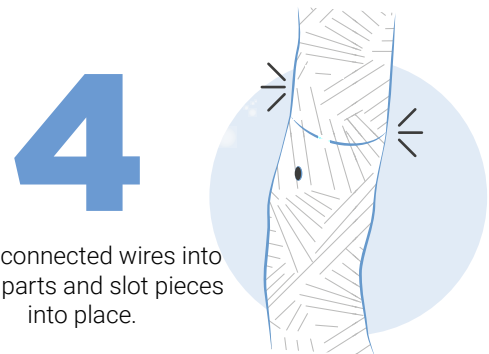

2 Connect the male/female electrical connectors, following the matching numbered trunk sections.

PROTECTIVE CAP

3 Screw the protective cap over the connections to ensure a watertight seal.

**4** Slide connected wires into trunk parts and slot pieces into place.

5 Using Allen key secure the trunk with grub screw.
